Trenton, NJ 08608

## Range of Services

FCC provides complete outsourcing and delivers a comprehensive range of telecommunications services and security solutions that we coordinate, set up and install. This includes the following:

**1** Setup and Configuration of:
- Telephones
- Desktops
- All-In-One Printers (Scan-Print-Copy-Fax)
- Site Surveillance & Security

**2** Internet Access, Coordination & Installation

**3** Local Area Network (LAN) Design and Installation (Wired and Wireless)

**4** Equipment Removal at Project Completion

In addition, for the duration of the project, you will receive:

**5** Unlimited Local and Long Distance Phone Service

**6** Maintenance Support

## Lower Initial and Ongoing Cost of Ownership

FCC is uniquely-positioned to provide you with the setup and maintenance of a custom phone system and computer network infrastructure. This eliminates the need for you to purchase and maintain your own equipment and substantially reduces your overall telecommunications costs.

## Key Advantages

● **Flexible Configuration:**

FCC provides flexible, customized solutions that make the best use of your wireless or wired network. We work hard to ensure that your trailer setup is easily reconfigurable and hassle-free.

● **Single Project Fee:**

Outsourcing our services to you means no hourly charges, no monthly bills, no rushed jobs, and fewer disappointments. With FCC, you get a single project fee that is agreed upon up front.

● **Managed Vendor Services:**

FCC offers simplified vendor management services. This single point of accountability provides you with time and costeffective consistency of telecommunication providers, billing and equipment so that you can focus on your core business.

# Construction Site Digital Security

To protect the resources and valued assets at your local or remote building sites, commercial businesses and residential properties, you want a complete surveillance solution. FCC Consulting Services (FCC) addresses your site's security concerns and provides a comprehensive, realtime monitoring and surveillance solution that captures and transmits live, digital images to your personal computer via a standard Web browser.

## Computerized Security and Surveillance

FCC along with its partners provide computerized security and surveillance solutions that allow you to continually monitor and record live activity at multiple sites remotely. Whether your needs are strictly equipment or require the design and installation of intrusion detectors or a call system, we offer discrete, turnkey solutions that can be mounted upon existing structures; including scaffolding, tower cranes and stairwells; transmitted to a receiving PC anywhere in the world.

## Open Eye Digital Recording System

To keep a watch over work progress or valuable equipment or site property, we use Open Eye Digital Recording (DR) Systems that utilize the most advanced digital video compression technologies. Open Eye DR Systems provide high quality picture and video performance over a WAN, LAN, telephone or Internet connection.

## Experienced, Adaptable Service

At FCC, each system is custom-built to your organization's requirements and specifications. Our staff of experts can install and service the system you need, depending on the situations and areas that you want to address. In addition, we can easily adapt camera locations as needs progress and your visual monitoring needs change.

## Key Advantages

| | |
|---|---|
| Engage in live remote viewing and playback of recorded surveillance video via any Local Area Network (LAN) or the Web. | Record high-resolution digital images for a period of 20-60 days, or for a longer period, using standard resolution. |
| Rapidly retrieve recorded incidences by date and time without the need to spool through hours of recordings. | Remotely monitor, control and manage intrusion devices, surveillance, access control and more. |
